

FALL SEMESTER 2011
Structural Geology Seminar
NO C 6, Wednesday, 17:15 – 18:00

Date	Speaker	Title
21.09.		
28.09.	NO TALK	Geological Institute Assembly Apéro
05.10.		TOPO Alps meeting Davos
12.10.	<i>Germán Rubino (Lausanne)</i>	Seismic attenuation and velocity dispersion in heterogeneous partially saturated porous rocks
19.10.	<i>Wang Qin (Nanjing University; ETH)</i>	Coeval extrusion and lateral flow of the Greater Himalaya: New insights from structural and geochronological data in southern Tibet
26.10.	<i>Marcel Frehner (ETH)</i>	Folds in nature and in the computer
02.11.	<i>Tom Mitchell (Bochum)</i>	Fracture damage and healing in the seismic cycle in nature and experiment
09.11.	<i>Laurent Jolivet (Orleans)</i>	Aegean tectonics: progressive strain localisation, slab tearing and trench retreat
16.11.	<i>Giulio di Toro (Padova)</i>	Constraints on friction during earthquakes from rock deformation experiments
23.11.	<i>Bernhard Grasemann (Vienna)</i>	Evolution of the Zagros Fold and Thrust Belt (N-Iraq)
30.11.	<i>Niko Froitzhem (Bonn)</i>	The Combin shear zone and its role in exhuming the Zermatt-Saas ultrahigh-pressure rocks
07.12.	<i>Daniel Egli (ETH)</i>	Neogene Tectonics of the Mont Blanc Area
14.12.	<i>Philip Benson (ETH)</i>	Laboratory simulations of high strain processes: old lessons and new tricks
21.12.	<i>Guido Scheurs (Bern)</i>	A new perspective on the significance of the Ranotsara shear zone in Madagascar: Implications for Gondwana reconstructions
